# Why is 911 Important

9-1-1 stands for emergency and it is important for everyone to know why to dial 9-1-1, in case you need help right away. They will give you information so you can survive. 9-1-1 helps you if you get hurt, have a bad accident, get lost and if you get in a fire.

When you call 9-1-1 they will send an ambulance to you, as fast as they can to help you if you're hurt or have a car accident and they will stay on the phone and talk to you until help comes.

9-1-1 will send the police if you get robbed or if you get lost and it's ok if you cry because they will still help you.

If your brother or sister or someone starts a fire you need to call 9-1-1 and they will send the fire department out and stay low and stop drop and roll. And don't ever ever call 9-1-1 unless it's an emergency.
