## Why is 911 important?

I think 911 is important because it saves people's lives.

If 911 didn't exist we would have to know emergency numbers for the police and fire departments or call the operator to be connected to the police and fire departments.

Calling 911 allow us to quickly contact the paramedics, firemen, and police. We can get help in a hurry with 911.

If someone has a heart or asthma attack, you could call 911 for someone to come and help. If you fall and hurt yourself, you could call 911 for help.

I think 911 is important because it is an emergency number that is used in all of the United States. So, if you are on vacation and need help you can call 911.

911 is an easy number to remember. Kids who are three years old have helped save their sick Mom's or Dad's life by calling 911.
